

THERMOFUSED MELAMINE

LOW PRESSURE LAMINATE FINISHES

Spacesaver is pleased to offer 16 color/pattern selections of quality low pressure laminate product for use as face panels, back panels and tops on mobile and stationary shelving units. Thermofused melamine low pressure face and back panels provide a multipurpose, economical and decorative finish.

These decorative panels consist of a melamine resin-impregnated decorative paper, thermally fused to an industrial grade 3/4" (19 mm) particleboard. Lamination is permanent. Durability is built in. The panels are also highly resistant to stains, scratches, abrasion, chip-out, burnishing, steam, and radiant heat.

All colors and patterns shown are printed reproductions and may differ slightly from the actual product. Please refer to actual samples before specifying.

High pressure laminate is also available. Please contact your local representative for a brochure.

*Supplier note regarding Wilsonart matches:

All matches are suggested as the closest match in the Wilsonart Standard color line. Where the color names and numbers match (as in the case of D91 Slate Grey), the same paper is used to produce both the HPL and the LPL, but the finished look will not match exactly, due to light refraction differences caused by vastly different manufacturing processes.

This reference chart has been prepared to help you find color matches.

Spacesaver cannot guarantee matches. Please refer to actual samples before specifying.
